

## Document Camera Documentation

This document will show you how to change the resolution on the document camera and select the camera that you would like to use.

First you will need to find the software on your desktop. The icon should look like this.

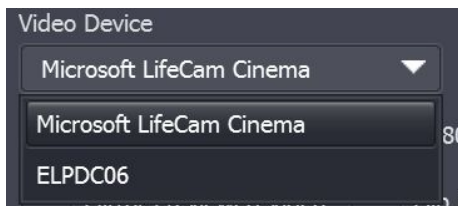

After you open the software and select capture, you will come to this screen. To change the resolution click on the drop down at the upper right and select 800x600.

To change the camera input, click on the wrench and screwdriver at the top right.

And then there should be a drop down box in the middle of the screen called Video Device. You should select ELPDC06 for the camera.
